

The following is a specific summary of the consulting services that can be customized to meet your center's needs:

- Monthly Medication Regimen Review:
- Optimize the efficacy of each resident's medication regimen and minimize the morbidity of each regimen
 - Assures center documentation exists to support medication therapy regimens and practices
 - Evaluate the center's compliance with State and Federal regulations governing the proper administration of medications and to communicate the recommendations to the nursing staff and/or resident's attending physician
- Statistical Studies:
- Perform outcome-oriented statistical studies such as medication utilization, psychoactive utilization, etc.
- Medication Disposition:
- Assist in the disposition of expired/discontinued controlled medications
- Medication Unit Review:
- Evaluate the center's compliance with state and federal regulations governing the acquisition, disposition, handling, storage and administration of medications and to communicate the recommendations to the nursing staff
- Med Pass Observations:
- Med pass observations to ensure accurate administration of medications per state and federal regulations
- Education:
- Alert nursing staff to specific medication information and industry standards to maximize safe and effective use of medication therapy
 - Provide in-service education on clinical and regulatory issues on an "as needed" basis
- Quarterly QA Meeting:
- Will provide a quarterly summary report at the center's quarterly quality assurance meeting
 - Offer information on new medications, medication warnings, recalls, etc.
- Policy Development:
- Assistance in developing, implementing and monitoring of policies and procedures for the safe and effective administration of medications
- Survey Assistance:
- Assistance with medication therapy or medication management issues during survey
