

The following is a brief summary of the pharmacy services that can be customized to meet your center's needs:

- Paperless Pharmacy:
 - State-of-the-art paperless pharmacy. All medications sent via fax are automatically converted into an electronic document in our pharmacy management software. This eliminates phone calls to verify if the fax was received by the pharmacy as well as insuring timely delivery

- Decrease Medication Errors:
 - Prescription labels contain a description and picture of the medication which helps avoid possible medication errors

- Medication Safety:
 - All delivery totes are sealed at the pharmacy so the center is the first to open the medications

- Reduction in Costs:
 - Drug returned for credit – center will be provided with a tote for return of medications. The pharmacy should be called as needed to pick up these totes. The pharmacy will issue credit for returnable medications and non-returnable medications will be sent back to the center for disposition

- Pharmaceutical Services:
 - 24 hours a day, 7 days a week
 - Automatic allergy and drug interaction monitoring
 - Formulary and cost containment

- IV Therapy:
 - RN clinical support services
 - IV pharmacist support services
 - Pharmacokinetic dosing and total parenteral nutrition

- Clinical Consulting:
 - Comprehensive medication regimen review (MRR)
 - In-service education
 - Med pass observations and med unit reviews
 - Survey support

- Our Mission:
 - To provide superior pharmaceutical care to the Southern California nursing home market for the purpose of maximizing a patient or resident's well being through drug therapy and positive therapeutic outcomes
